

IMPACT

"Thank you to Phoenix Cancer Support Network for the amazing work that you do, helping so many individuals & their families when diagnosed with cancer.

Because of your help in filling the gaps with transportation, several of my patients have been able to finish their life saving cancer treatment. Another one of my patients has been struggling to eat well while they have been in treatment, she is on a fixed income and has not been able to get healthy food.

She has tried different programs which left her sick and that is not a good combination while she is undergoing cancer treatment. With your help she will now be able to purchase nutritious food while she is undergoing treatment."
