

IMPACT

"On Sept 11, 2017 my whole life turned upside down. I was diagnosed with stage IV triple negative metastatic breast cancer. At 45 yrs. old, single and living 1400 miles away from any family, scary doesn't really cover it. I was put in touch with Phoenix Cancer Support Network and Jenny Martin. I wish had the words to describe Jenny and her team. The closest I can come are Angels here on earth. From the amazing volunteers who help with cleaning my house, doing yard work and even walking my dog, to helping me with paperwork I can't understand, and making sure I have groceries. These are just some of what the PCSN provides.

I would be remiss if I also didn't point out how AMAZING and compassionate Jenny and her volunteers are. Always encouraging, always emotionally supportive when you feel like giving up and are just too exhausted. Jenny never lets you give up, they are always there to pull you back into the sun. Thank you!" --Teresa, PCSN Client
